

In pursuit of KUNRF vision and mission, we seek:

- To establish large-scale high impact research programs in nanotechnology and advanced engineering materials.
- To expand interdisciplinary interactions between KU researchers.
- To create and support collaboration opportunities for KU researchers with prestigious technology institutions and industries at local, regional and international levels.
- To support knowledge-based development in the fields of nanotechnology and advanced engineering materials with respect to education, research and industry.
- To enhance KU research capabilities by the continuous upgrade of current facilities and the development of human resources via training, seminars and workshops.
